

# High Visibility Check-In Process

View all your active shifts as you're checking employees in. Viewing multiple jobs at once makes your check in process faster and easier.

The screenshot displays the WAE mobile application interface for checking in employees. At the top, there is a navigation bar with the WAE logo and a shopping cart icon. Below this is a purple button labeled 'Add a Job'. A date indicator shows 'Thursday 6/20/24'. On the right side, there are filter options: 'Filters', 'Dates', 'Shifts', 'Position Name', and 'Status'. The main content area is divided into four vertical panels, each representing a different job instance for 'Technician Level II' with 10 employees. Each panel shows a list of employees with their names and a check-in status (checkbox). Below the list is a table with columns for 'CLOCK IN', 'CLOCK OUT', 'HOURS', and 'TOTAL HRS'. The interface includes interactive elements like 'Edit Time' and 'Approve' buttons. A 'RESERVE LIST' is visible at the bottom of each panel. A context menu is open over one of the employees, showing options like 'No Show' and 'Sent home'. Purple arrows point to various elements across the panels, highlighting the multi-view functionality.
